PROFILE SUMMARY

Results-driven Web Developer and SEO Specialist with expertise in WordPress and the MERN stack. Skilled in building scalable web applications, REST APIs, authentication, and database management, with a strong focus on performance, optimization, and user experience.

WORK EXPERIENCE

M360ICT 2023-2024
Software Engineer

- Built scalable web applications with Next.js, React.js, and MERN stack, focusing on frontend design, APIs, authentication, and performance optimization.
- Collaborated with cross-functional teams to deliver client-focused solutions, leveraging Git for version control and code reviews to ensure high-quality, scalable, and maintainable code.

Aan Nahal 2021-2022
SEO Specialist

- Improved website traffic and visibility with SEO strategies including keyword research, on-page/off-page optimization, link building, and technical audits to boost performance.
- Collaborated with content teams and developers to align SEO with business goals, while using Google Analytics and Search Console to monitor results and refine strategies.

Fiverr 2020 - 2025
SEO and Web Development

- Super Local SEO & Online Visibility: Specialized in boosting local businesses' search rankings with targeted SEO strategies.
- Full Website Solutions: Delivered on-page SEO and designed custom, responsive WordPress, Shopify, Wix, and BigCommerce websites with optimized performance and user-friendly navigation.
- Ongoing Support & Integration: Optimized SEO structures, metadata, and keywords, integrated plugins/APIs, with continuous maintenance and monitoring.
